Our social care system is failing everyone except the private providers who are rinsing it for profit

Half those requesting support get no help. 13,000 are stuck in hospital for want of community services. Rationing by cash strapped Local Authorities results in more stressful, demeaning assessments for erratic, institutionalised support. Higher care charges drive some people to give up services while others are pursued for debt. Attacks on benefits fan division, stigma and abuse. 10 million unpaid carers are largely unsupported and unheard. Care workers average £12/hr, turnover is 30%. Staff from overseas face exploitation and hostility; already prevented from bringing children here, they are now confronted with changing goalposts on leave to remain. Almost half of those in poverty are in families where someone is disabled.

Join us and help to raise a mighty roar to end this social care disgrace and violation of human rights now!
